

Sintered Bronze Plates

GOLDEN SINTERED PLATES

GOLDEN manufactures and stock a wide range of high quality Steel Plates in various sizes and shapes upto 750mm Outer Dia with Thickness approx 7mm for wet or dry clutch and brake applications. Steel plates are where the heat goes during shift and are another important component of the clutch or brake systems.

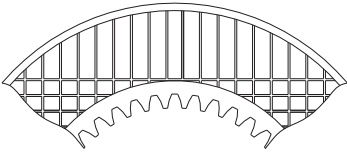

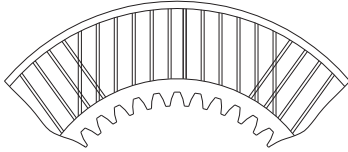

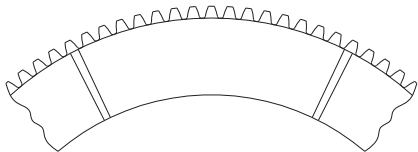

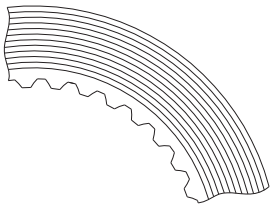

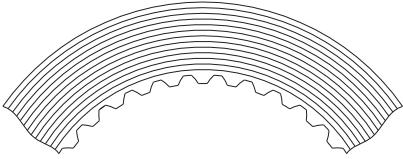

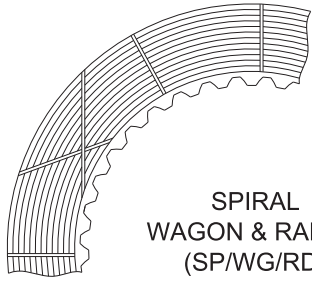

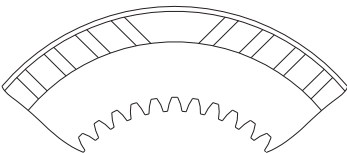

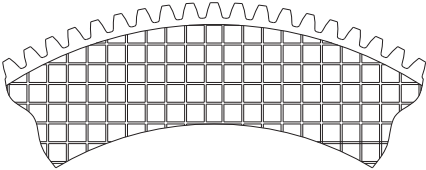

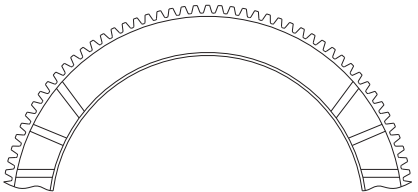

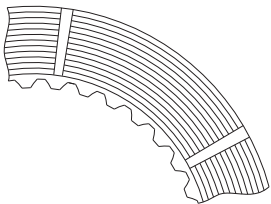

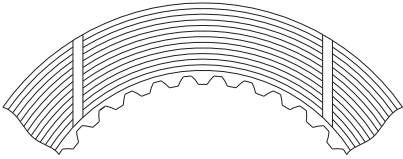

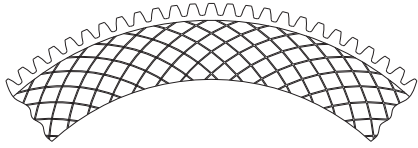

FEATURES

- Better shift performance
- Better clutch durability
- Superior surface furnish for better torque performance
- Options available in Laser Cut or Toolings.

BENEFITS

- Low Tooling Costs
- Reduce costs and quick delivery time by ordering small or large quantities.
- We can design Steel Plates as per your requirement.
